Chronic Pain

Over 40 million Americans have chronic joint pain, including 80% of people over age 50. The weight-bearing joints, such as the hips and knees, as well as the joints of the hands are often the most affected. Bone and joint pain can result from excess weight, eating an acidic diet, gallbladder or kidney congestion, wearing away of cartilage and infection.

For many, inflammation, stiffness and pain have become a way of life. Nonsteroidal anti-inflammatory drugs (NSAIDs) are often prescribed by doctors. However, side effects are common and are often severe enough to negate any benefits that may be experienced from the drugs. Side effects can range from gastrointestinal distress, kidney problems, tumor formations, headaches and more.

Many people are turning to non-drug alternatives which have none of the side effects associated with NSAIDs. For-

tunately, it is no longer necessary to suffer with pain or endure the unpleasant side effects associated with medical drugs.

Synergistic Formula

It is important to consider the whole body when confronted with pain. Every system of the body works together. That is why a synergistic nutraceutical formula is the most effective in supporting a healthy body, free of pain. Nutrients that support an alkaline pH, bone and joint strength, flexibility and detoxification and cleansing of key organs are highly effective when dealing with bone and joint concerns.

Quantum Bone and Joint Complex is a clinically tested nutraceutical formula with synergistic herbs working together to bring the very best results. Each ingredient is exquisitely well-grown and is free of any pesticides, chemicals or contamination. Experience a quantum leap in superior bone and joint health, strength, endurance and flexibility.*
